

# Rydis H68 Pro Motherboard Replacement

Replace a defective Moneual RYDIS H68 Pro motherboard for a new one to ensure a long lasting machine.

Written By: Jessica Alimonti

## INTRODUCTION

Vacuum does not power on even after the battery has been replaced? The motherboard may be defective. Follow this guide on how to change it for a new one!

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [Metal Spudger](#) (1)
-

## Step 1 — Battery

- Flip the vacuum over so that the wheels are facing you.
- Use a Phillips #1 screwdriver to remove the four 10mm screws that surround the battery cover.

## Step 2

- Lift up the battery cover to reveal the battery.
- Remove the battery.

## Step 3 — Bumper

- Remove the eight 10 mm Phillips #1 screws.

## Step 4

- Hold the front bumper and pull it off.
- ⓘ It requires a lot of force to pull the bumper off.

## Step 5

- Pry off the back bumper by going around the entire top of the bumper with the metal spudger.

## Step 6 — Motherboard

- To access the motherboard entirely, lift the top portion of the vacuum off.

## Step 7

- Locate the four main 10mm screws on the underside of the motherboard.

## Step 8

- Use a Phillip's #1 screwdriver to unscrew and remove the four 10 mm screws.

## Step 9

- Pinch the two tabs together, shown here, to loosen the motherboard out of the vacuum.
- Lightly pull on the silver box shown to lift the motherboard out.

To reassemble your device, follow these instructions in reverse order.
